OUR BUSINESS IDEA

Online monitoring solutions

Taking our business from land to sea

EHP Environmental monitoring buoy

WHAT WE ARE LOOKING FOR

EHP is looking for new customers in Europe to implement online monitoring buoy

Customers from aquaculture, to modify our monitoring system to meet their requirements

Authorization of the measurement technique and accreditation of online monitoring data

Cooperation with authorities

EHP ENVIRONMENT

Over 15 years of online monitoring experience in the company

Technicians, high education in hydrology and other water related measurements

Leading expert within this field in Finland

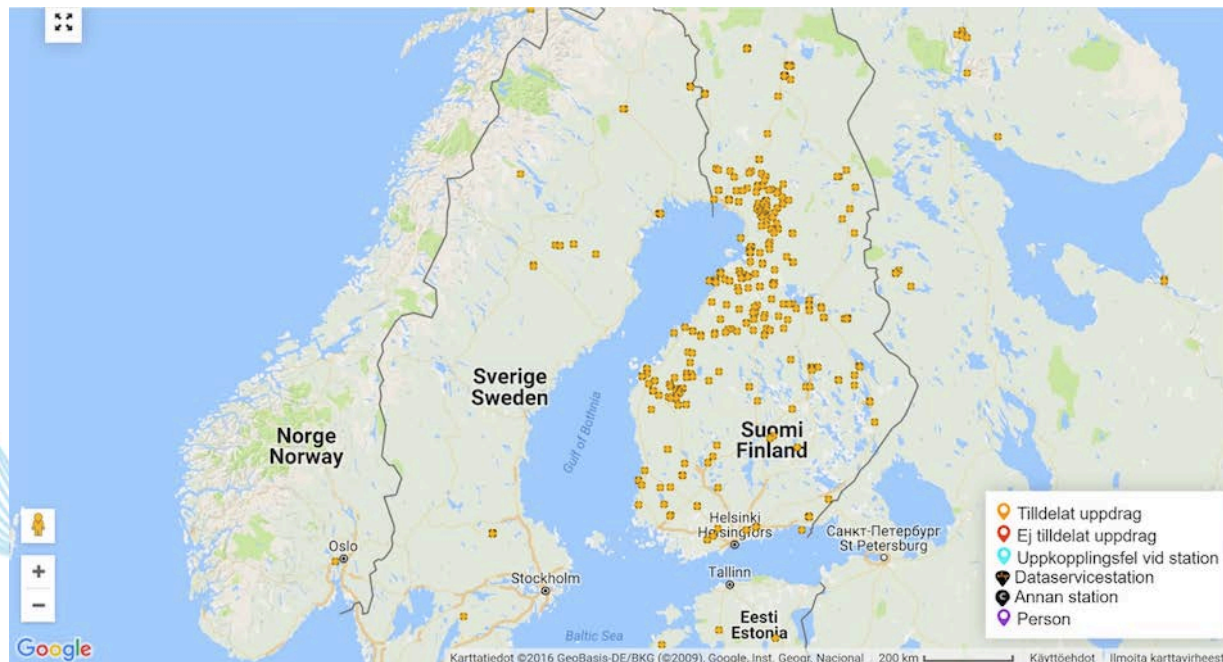

OUR TARGET MARKET

Northern Europe, market size about 100 M€

Heavy industries, mining, waste management, infrastructure projects etc.

New target market: Aquaculture

Online monitoring for: Environmental safety; impact of aquaculture and effects on aquaculture, process management, fast reporting and to meet strict regulations for operations in the sea

OUR IDEA

EHP Monitoring buoy

For 24/7 monitoring of weather conditions and water quality, flow speed and flow direction in the sea.

Real time environmental monitoring from remote places, data directly to the cloud

Early warning system

Monitoring parameters for aquaculture

O₂

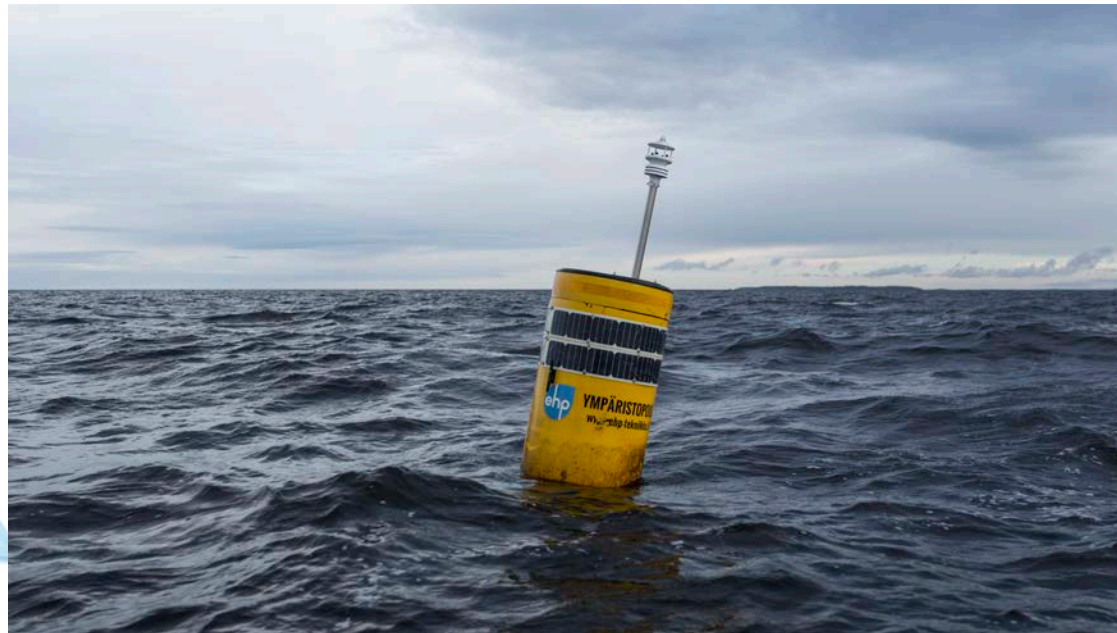

Temperature

pH

Blue algae

Conductivity

Development of sensors for nutrients

OUR BUSINESS PLAN

Marketing in expos and conferences

Sales directly to companies

Looking for new sales channels to aquaculture sector

Need to boost up our sales capacity (cost estimate about 100.000€)
